

Gas Flare

Gas Flare Stack is used to burn the gas which is separated from the test separator and surge tanks. When gas needs to burn, it will be rigged up hydraulically by manual, when finishing work, it can be collapsible.

APPLICATIONS

- ▶ Well Testing

FEATURES & BENEFITS

- ▶ Skid Mounted with height adjusted pole manually
- ▶ Remote control
- ▶ Automatic ignition

SPECIFICATIONS

Type	4GF	6GF
Size	4"	6"
Pressure (psi)	1440	1440
Capacity (MMSCFD)	60	120
Height of Flare (ft)	60	90
Ignition	Electric (220V/350HZ)	Electric (220V/350HZ)
Ignition Medium	LNG	LNG
Weight (kg)	4,300	6,600
Working Temperature (°C)	-19~90	-19~90
Skid Dimension (mm)	7,500×2,000×1,600 (LXWXH)	11,500×2,000×1,800 (LXWXH)
